

## TRACKVIA SANDBOX

Making changes to your TrackVia™ applications in a live environment is like trying to change a tire on a car while driving. You risk impacting your users and your business.

TrackVia Sandbox environments eliminate the risks associated with making changes to your application by giving you a safe place to test or experiment, both on web and mobile devices, without disrupting your live production applications.

### TEST DRIVE APP CHANGES IN A SAFE ENVIRONMENT

Built for super administrators, a TrackVia Sandbox allows you to create a copy of your entire account, including all apps and data (except audit records). This duplicate account, or sandbox, is a snapshot copy of your production applications.

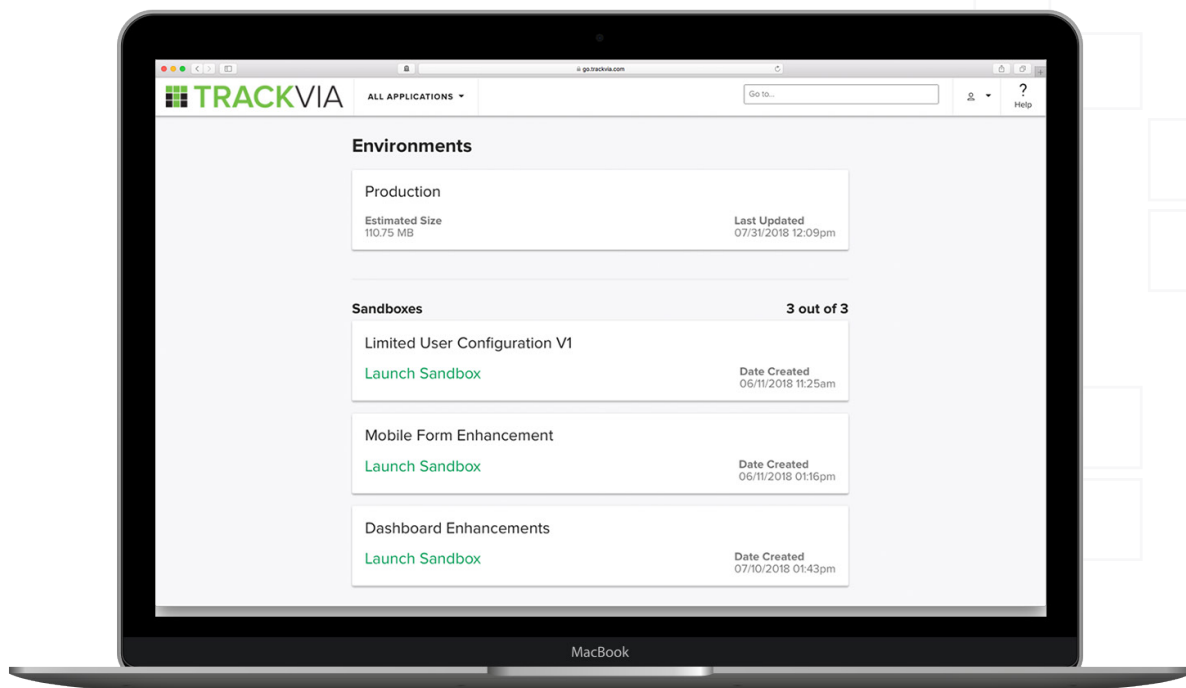

Within your TrackVia Sandbox environment, you can:

- Sign in as any user to test their role and permission settings
- Instantly troubleshoot any end-user issues
- Verify your customers' and vendors' application experience
- Test changes to fields, views, filters, forms, and dashboards before applying them to production
- Test complex Flows or Application Scripts before they go into production

## LEARN MORE ABOUT TRACKVIA SANDBOX

TrackVia Sandbox takes the risk out of your application development and maintenance. To learn more about Sandbox, contact your TrackVia account manager today.

TrackVia™, the leading workflow platform for operations™, helps companies build applications that improve on-time performance and reduce costs. TrackVia offers operations leaders the fastest and easiest way to build powerful applications that are business led and IT-approved. Companies like Honeywell, Leidos, DIRECTV, Healthways, and Brinks, rely on TrackVia to digitize their operations.
