

BUSINESS APPLICATIONS FOR YOUR OPERATIONS AT THE SPEED OF NOW

TrackVia™ provides a way to create enterprise-class web and mobile apps customized for your business and IT requirements in a fraction of the time of heavy enterprise software. With TrackVia, you can digitize your operations to eliminate manual data collection, integrate with multiple systems, automate critical workflows, and analyze data for informed decisions.

FAST AND EASY. GET UP AND RUNNING IMMEDIATELY

With the help of TrackVia experts, most organizations deploy their custom applications in weeks, not months — with clicks, not code. This is accomplished through the TrackVia platform’s industry-leading and signature drag-and-drop functionality, and intuitive, visual tools. And, unlike other enterprise software, TrackVia applications are IT pre-approved — eliminating the need to wait for IT.

FULLY CUSTOMIZABLE. RUN YOUR BUSINESS YOUR WAY

Web and mobile applications built on the TrackVia platform are infinitely customizable and configurable — allowing you to tailor apps to your business operations. Modify, tweak and adapt your apps anytime, with just clicks, to ensure that your platform is always up-to-date. The best part? Changes you make to apps on your platform are instantly reflected across all of your web and mobile devices.

“The TrackVia platform is easy to use and the TrackVia team has provided excellent service in helping us build a custom, mobile native application. With TrackVia we have vastly improved project visibility, reporting, and analysis.”

MOBILE READY. TRULY ENABLE WORK FROM ANYWHERE, ANYTIME

Unlike most vendors, which only offer a web-based solution or require separate development, native mobile apps for iOS and Android devices are built into the TrackVia platform — providing you with these unique advantages and more:

- Collect and edit data anywhere, even when offline
- Scan barcodes to find records
- Attach audio notes, pictures, and geo-location to records
- Capture signatures

IT APPROVED. FULLY SECURE AND READY TO ROLL

Hosted on Amazon AWS, TrackVia is the leading workflow platform. Your IT department can rest assured that your TrackVia applications are completely secure and highly available:

- Advanced at-rest encryption
- Enterprise-grade authentication protocols
- Full redundancy for high availability / disaster recovery

Also important to IT, TrackVia delivers advanced developer features, such as App Scripts and robust API options, for deeper levels of integration and highly sophisticated customizations.

LET US PROVE THE VALUE. GET STARTED WITH A CONVERSATION TODAY

TrackVia helps energy and utility companies drive significant improvements in efficiency, safety, and compliance – helping to drive bottom-line results.
