

BUSINESS APPLICATIONS FOR YOUR OPERATIONS AT THE SPEED OF NOW

TrackVia provides a way to create enterprise-class web and mobile apps customized to your business and IT requirements in a fraction of the time of heavy enterprise software. With TrackVia, you can digitize your operations to eliminate manual data collection, integrate with multiple systems, automate critical workflows, and analyze data for informed decisions.

FAST AND EASY. GET UP AND RUNNING IMMEDIATELY

With the help of TrackVia experts, most organizations deploy their custom applications in weeks, not months and with clicks, not code. This is accomplished through the TrackVia platform's industry-leading and signature drag-and-drop functionality and intuitive, visual tools. Additionally, unlike other enterprise software, TrackVia applications are IT pre-approved — eliminating the need to wait for IT.

FULLY CUSTOMIZABLE. RUN YOUR BUSINESS YOUR WAY

Web and mobile applications built on the TrackVia platform are infinitely customizable and configurable — allowing you to tailor apps to your business operations. Modify, tweak, and adapt your apps anytime, with just clicks, to ensure that your platform is always up-to-date. The best part? Changes you make to apps on your platform are instantly reflected across all of your web and mobile devices.

With TrackVia, Fifth Third Bank built a procurement management workflow platform to automate approval processes and track cost saving activity. Their results include reduced admin time, as well as the ability to report on hundreds of contracts negotiations across the U.S. in real-time.

MOBILE READY. TRULY ENABLE WORK FROM ANYWHERE, ANYTIME

Unlike most vendors, which only offer a web-based solution or require separate development, native mobile apps for iOS and Android devices are built into the TrackVia platform — providing you with unique capabilities including:

- Collect and edit data anywhere, even when offline
- Scan barcodes to find records
- Attach audio notes, pictures, and geo-location to records
- Capture signatures

IT APPROVED. FULLY SECURE AND READY TO ROLL

Hosted on Amazon AWS, TrackVia is the leading workflow platform. Your IT department can rest assured that your TrackVia applications are completely secure and highly available:

- SOC 1 compliant
- Advanced at-rest encryption
- Enterprise-grade authentication protocols
- Full redundancy for high availability / disaster recovery

Also important to IT, TrackVia delivers advanced developer features, such as App Scripts and robust API options, for deeper levels of integration and highly sophisticated customizations.

LET US PROVE THE VALUE. GET STARTED WITH A CONVERSATION TODAY

TrackVia helps organizations improve on-time performance and reduce costs. Learn specifically how your organization can benefit by **contacting us today!**

“TrackVia has helped us centralize and streamline key post closing and credit risk processes. And the straightforward, drag and drop configuration allows for quick customization of built-in features.”

JOSHUA YAKLIN, OPERATIONAL RISK DATA/ANALYTICS MANAGER

TrackVia, the leading workflow management platform, helps companies build applications that improve on-time performance and reduce costs. TrackVia offers operations leaders the fastest and easiest way to build powerful applications that are business-led and IT-approved. Hundreds of companies, like Pacific Union Financial, Stearns Lending, Fifth Third Bank, and Dow Venture Capital, rely on TrackVia to digitize their operations. Learn more at: www.trackvia.com
